

SUMMER HUNT ACTIVITY SHEET

1 Butterfly Drawing

Butterflies are symmetrical ...draw the other half and colour in with the bright colours you see on a butterfly.

The Butterfly Life Cycle: A butterfly's life begins as an egg for 3-7 days, until the egg hatches and they grow into caterpillars. As the caterpillars grow older they form a cocoon called a chrysalis and 2 weeks later a butterfly emerges!

Count the number of butterflies you find today and write down the number in the box:

Write down what colour butterflies you have seen today:

FUN FACT 1: In the world there are around 24,000 different species of butterflies!

2 Landmarks

What is your favourite landmark of the day? Please draw it in the box provided and give it a fun name!

DID YOU KNOW: Birds use landmarks to navigate long journeys

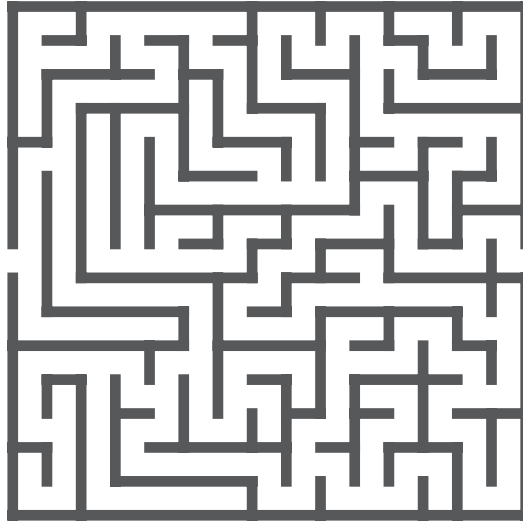

FUN FACT 2: Some chickens can lay green or blue eggs!

3

Hedgehog Maze

Can you help our hedgehog get home?
Draw the route for the hedgehog to get back to his nest.

FUN FACT 3: Hedgehogs can actually swim quite well and some can even climb trees!

4

Tree Bark Rubbings

On your summer hunt bring with you some coloured pencils or crayons to do some tree bark rubbings. Hold the paper against the tree and rub the coloured pencil lightly against the paper to see the different patterns of the wood. Compare a few of these rubbings for different types of trees.

Tree bark rubbing 1

Name of tree:

Tree bark rubbing 2

Name of tree:

Ask your family to help you identify each tree type and write these below your bark rubbings.

FUN FACT 4: One tree can produce enough oxygen to support a family of four for a year!

5 Eye Spy Tick List

When you spot them - tick them off the list!

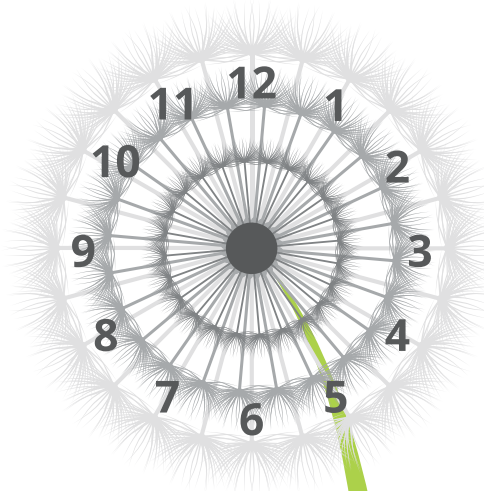

Ask your parents to help you find an animal trail and draw it below.

6 Dandelion Clock

Ask your parents to show you how you can use a dandelion to tell the time and don't forget to make a wish! Get them to help you draw the time on the dandelion clock below.*

* Simply count the number of breaths to blow off all the seeds of a dandelion to give you the hour number!
